Create a Web Page Presentation Using R Markdown That Features a Plot Created With Plotly

The rubric contains the following two questions:

1. Does the web page feature a date and is this date less than two months before the date that you're grading this assignment?
2. Is the web page a presentation and does it feature an interactive plot that appears to have been created with Plotly?

VISUALIZING THE RELATION OF MILEAGE mpg with OTHER VARIABLES of WEIGHT wt, ORSE POWER hp, and CYLINDER cyl

```
plot_ly(data = mtcars, x = ~hp, y = ~mpg,
        color = ~as.factor(cyl), size = ~wt,
        text = ~paste("Horse Power: ", hp, '<br>MPG:', mpg),
        type = "scatter", mode = "markers") %>%
  layout(title = "Car Mileages vs Horse Power, Weight, and Cylinder")
```

Using plot_ly function, the plot is interactive. Move the cursor to each point, the car data information shown. A very good plotting tool!
